## **DETAILED ACTION**

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

See that there is prior art regarding semiconductor devices comprising a bumped device, a substrate having pockets, and a conductive layer coupled to the bumped device and the substrate. For example, see that Akram, Yunus et al., Akram et al., Palagonia, Wark, and JP 09-162230 all disclose the above structural limitations.

However, the claims as amended specifically claim a bumped device having conductive bumps, a substrate having a plurality of pockets and a plurality of metallic contact pads distributed thereon, and an anisotropically conductive layer between the bumped device and the substrate. Also see the claims specifically recite the structurally disposition of the above with respect to one another. All these in combination with all other specific language recited in the claims make up for a device that is neither obvious over nor anticipated by the prior art of record, which fails to either alone or in combination anticipate the claims as presented. Hence the notice of allowability herein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
